

Combining Images

Complete the following Pyret expression to produce this final image:

```
background = rectangle(200, 400, "outline", "black")
cone = flip-vertical(isosceles-triangle(150, 30, "solid", "sienna"))

strawberry = circle(50, "solid", "pink")
chocolate = circle(50, "solid", "brown")
pistachio = circle(50, "solid", "lightgreen")
```

```
put-image(1_____, 100, 320,
  put-image(2_____, 100, 250,
    put-image(3_____, 100, 180,
      put-image(4cone, 100, 80, background_____
```

Look closely at your closing parentheses: how many do you need? Mark each parenthesis you added with the number of the opening parenthesis to which it corresponds.
