

Overlaying Images

Look at the Pyret code below, which produces this image of a pizza slice:

```
slice = flip-vertical(isosceles-triangle(200, 45, "solid", "orange"))
crust = rectangle(150, 20, "solid", "sienna")
pepperoni = circle(15, "solid", "red")
```

```
put-image(pepperoni, 75, 50,
  put-image(pepperoni, 45, 140,
    put-image(pepperoni, 100, 135,
      put-image(pepperoni, 65, 95,
        overlay-align(
          "center",
          "top",
          crust,
          slice))))))
```

Which `put-image` expression is responsible for placing each of the pepperoni slices onto the pizza? Draw a line from each piece of the expression to the part of the image it creates.
